Help Your Patients Save Money By Referring to In-Network Labs

Remember to refer lab services for your Truli for Health (Truli) patients to in-network lab providers whenever possible. Referring our members to in-network labs helps them avoid significant out-of-pocket costs.

Quest Diagnostics is our preferred lab provider while **AmeriPath®** and **DermPath® Diagnostics** are preferred labs for anatomical pathology and dermatopathology services for our Truli plans.

The terms of your Truli agreement require you to refer lab services to in-network lab providers. Doing this will help ensure your participation status with Truli does not change.

More Information

- To find in-network lab providers, please view our online provider directory at truliforhealth.com/providers.
- For more information about lab referrals, please refer to the Provider Manual at truliforhealth.com/providers and select **Truli for Health Provider Manual** under Manuals and Guides.

Help your patients maximize benefits and reduce out-of-pocket medical costs by always referring their lab services to in-network lab providers.

Questions?

If you have questions, please call the Provider Service Unit at 833-238-8144 or email us at networkcontracting@guidewell.com.
